

How to install Visual Editor

1. Download Eclipse (<http://www.eclipse.org/downloads/>) and unzip it.
2. Run eclipse.exe and select/create a workspace.
3. Click Help->Software Updates->Find and Install...
4. Select the Search for New features to install... and hit the Next button
5. Click New Remote Site ... and add this site (name it Eclipse 3.0):
<http://update.eclipse.org/updates/3.0>
6. Select Eclipse 3.0 (the one you just created!) and hit Finish. Select a mirror site when you are asked to!
7. Expand the tree and check the following:
 - EMF -> EMF SDK 2.1.2
 - GEF -> Graphical Editing Framework 3.1.1
 - VE -> Visual Editor SDK 1.1.0.1
8. Hit Next, accept the licences, hit Next, hit Finish
